

December 20, 1960

Mr. Lynne Empey
City Coordinator, City of St. George Corp.
237 North Bluff Street
St. George, Utah

Dear Mr. Empey:

On January 6 there will be a hearing on the St. George application to change the point of diversion and nature of use.

At that time the matter of water distribution will be discussed with the various users. If it seems desirable, Mill Creek water users will be invited to attend the annual Virgin River Water Users' meeting and included under water distribution by the State Engineer.

You, of course, realize that under state law the users are assessed for all distribution costs.

Yours very truly,

Wayne D. Criddle

WDC/eca
